

Internet Data Center Solution

Comprehensive Monitoring for Environment, Security, and Power Efficiency in Data centers

Environment Monitoring

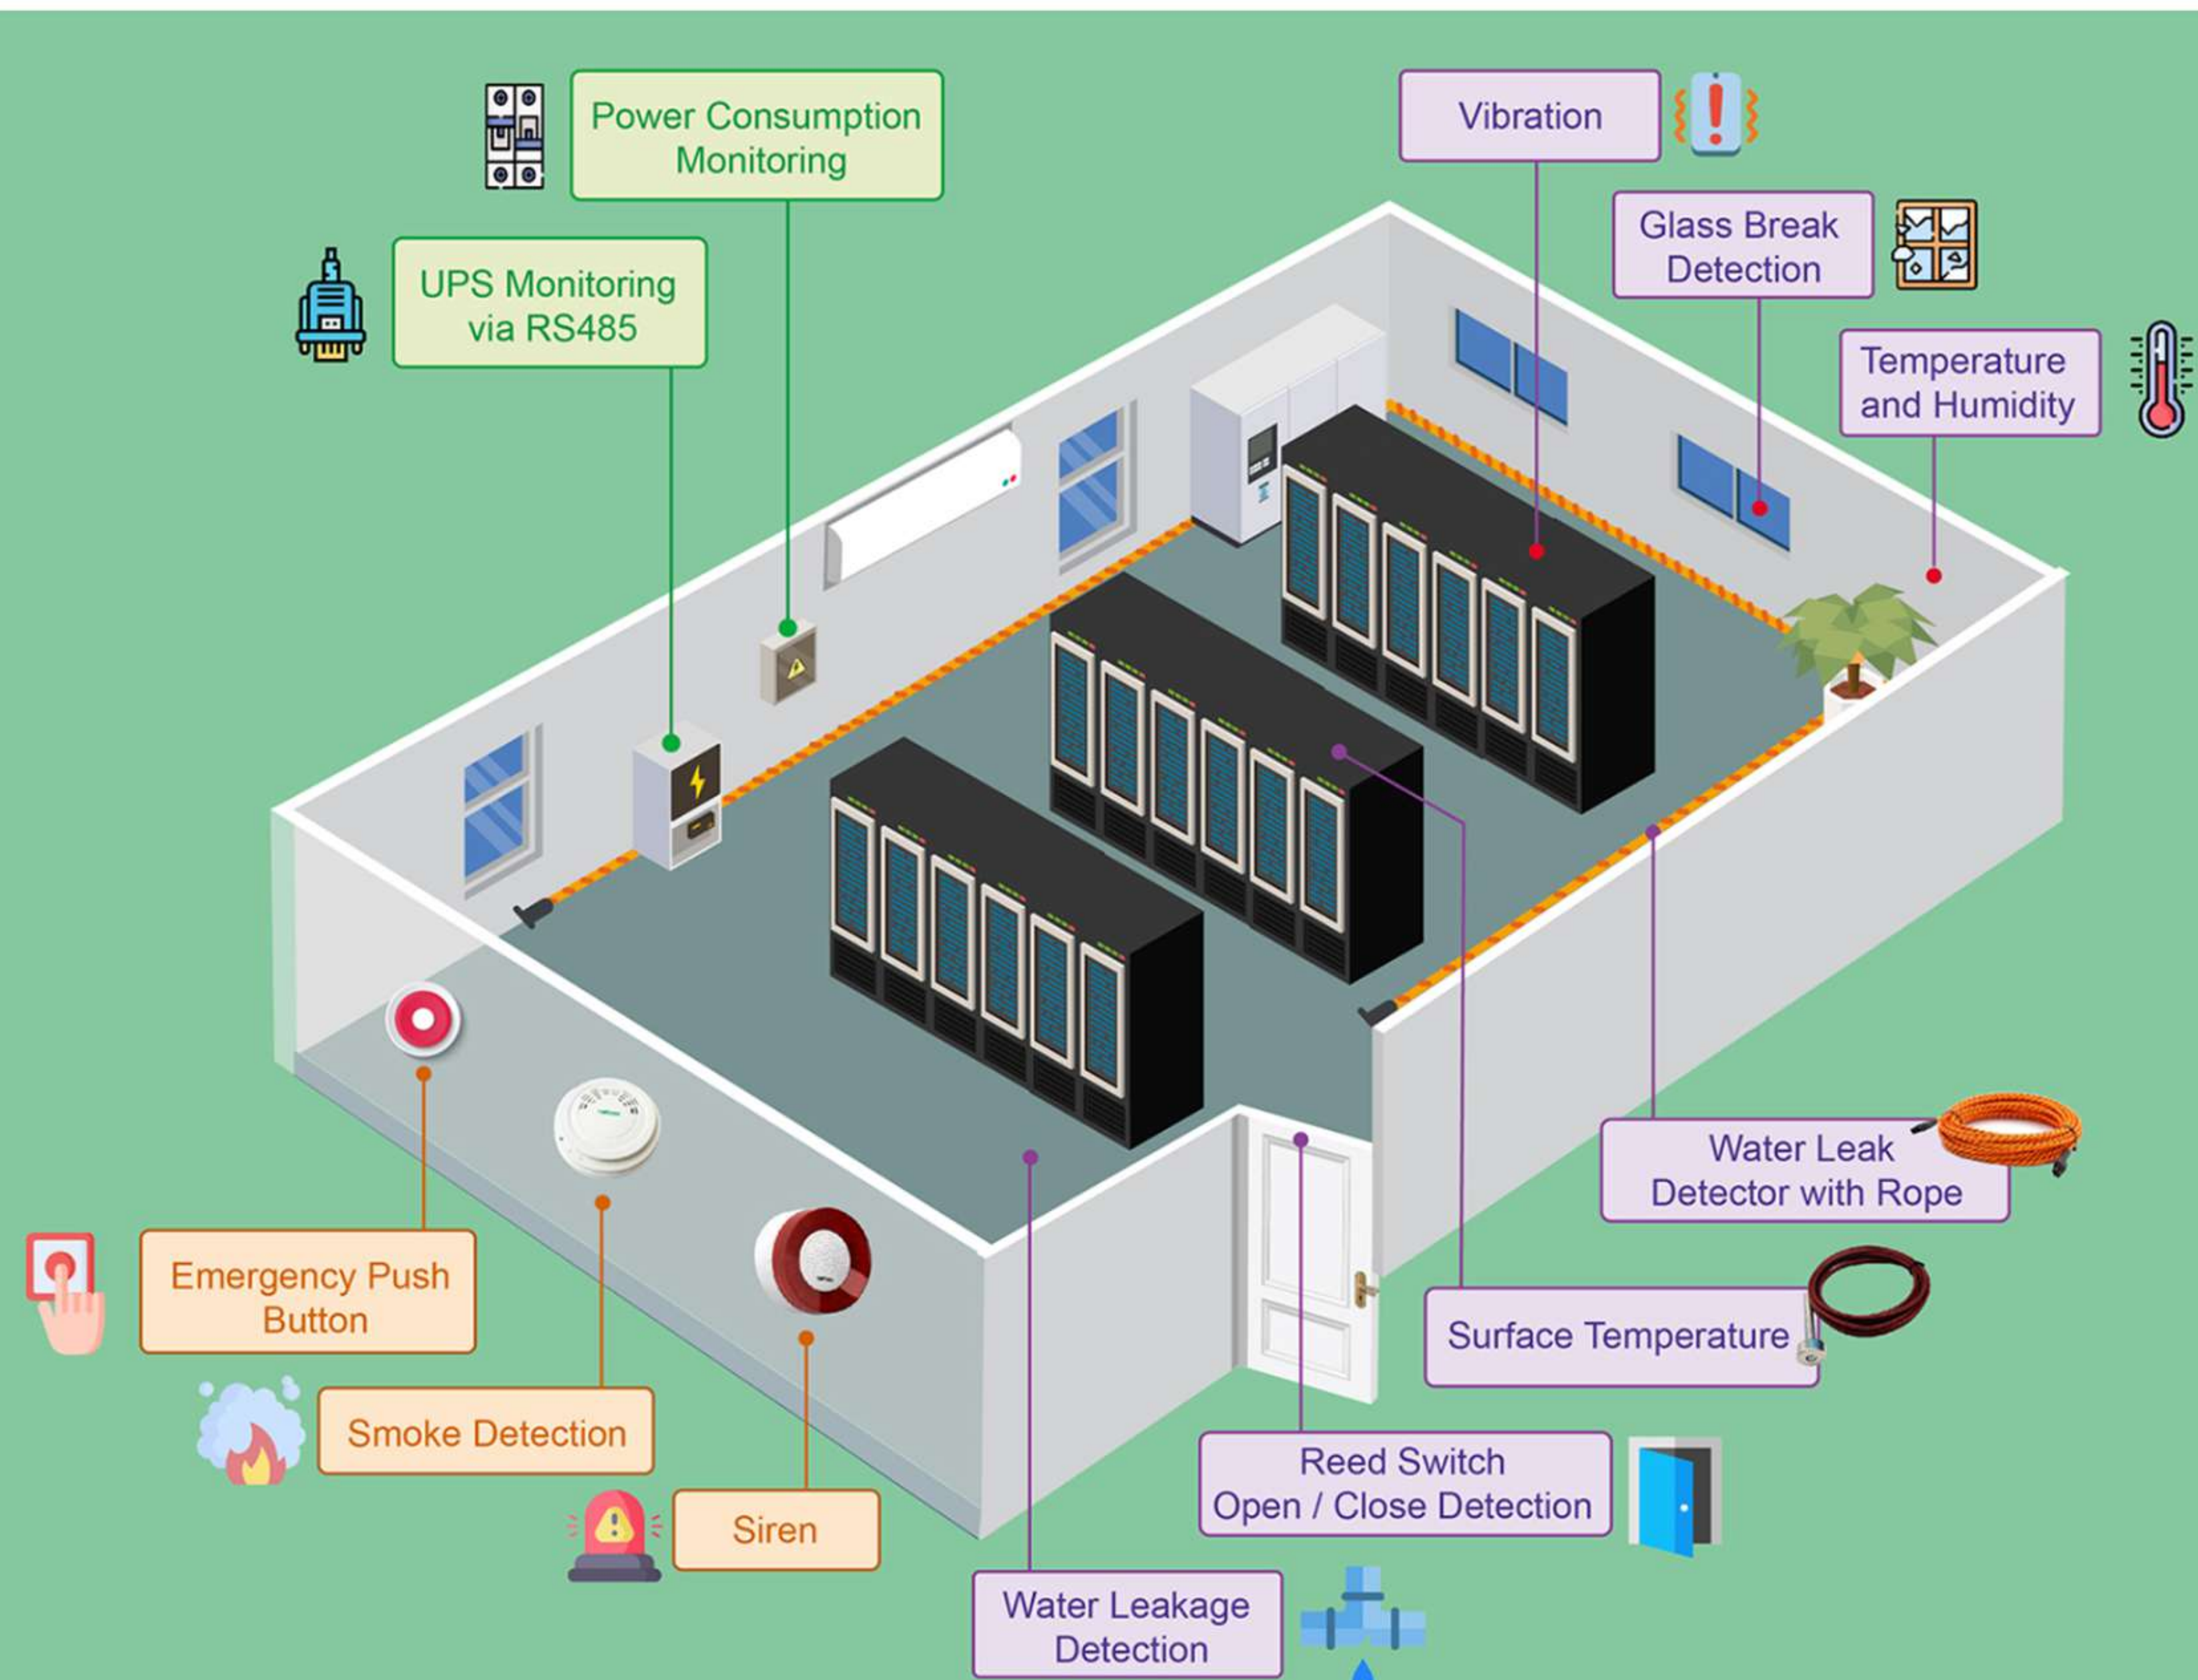

Ensuring equipment operates under optimal conditions

Security Monitoring

Immediate alarm notification in emergency situations

Energy Monitoring

Track and manage energy usage by recording power consumption

Wireless 1P+N Miniature Circuit Breaker with Power Meter and Leak Detection

RP02RH1PNLB063

- Remote operation
- Real-time monitoring
- Calculate power consumption

Wireless RS485 Adapter

R718PC

- RS485 Transparent transmission
- Read RS485 data regularly

Wireless Temperature / Humidity / Built-In Vibration / PIR / Emergency Button / Tilt / Water Leak / Reed Switch / Glass Break Sensor

R31512

- 8 in 1 sensor
- Temperature / Humidity / Built-In Vibration / PIR / Emergency Button / Tilt / Water Leak / Reed Switch / Glass Break

Wireless Temperature Sensor - Magnetic Probe

R718B122

- Types of probes: round, needle, and magnetic
- PT1000 platinum resistance thermometer

Wireless Water Leak Detector (Rope Sensor) Wireless Water Leak Detection and Location Sensor

R718WB/RA07W

- Cover larger areas and detect leaks instantly
- Detect leak location

Wireless Push Button Interface Wireless Push Button

R718T/R718TB

- Connect to existing buttons

Wireless Siren

R602B

- 4 types of alarm sounds
- 2 modes of flashing lights

Wireless Smoke Detector Wireless Cigarette Smoke, Vaping and Bullying Alarm Sensor

RA02A/RA02G

- Smoke / Cigarette smoke detection
- High temperature alarm
